

Pie With a Crisp and Delicious Crust

The kind of pie that mother used to make can be duplicated with Daisy Flour—the flour for better baking.

Milled with superior methods, the latest improved machinery and from the best wheat, you are assured of better baking results, more loaves to the sack.

All of Mexico's discriminating cooks insist that they have Daisy Flour when they bake. They know they will have perfect results.

DAISY FLOUR

FOR SALE BY ALL CROCCERS

Milled by the Pollock Mill and Ele. Co., Mexico, Mo.

there is such a thing as an average weight for a given height and age. If children are below that average they are below par. If they are as much as 15 or 20 per cent below, some special effort should be made to bring the child up; because malnutrition is as definite a departure from health as tuberculosis. Some of the after effects can never be overcome, and a malnourished child is likely never to be as strong as he could have been.

Eye strain frequently causes nausea and loss of appetite, resulting in malnutrition. Lack of fresh air while sleeping and exercising, lack of cleanliness and proper clothing, fast eating, indulgence in sweets between meals, drinking tea or coffee—on one or more of these apparently simple causes may result in physical disaster for the child. Because of the importance of a child's weight, it is necessary to interest parents in this particular. When a child goes home wearing, for the first time, the yellow tag which tells the story of his examination at school questions ensue and parents are interested.

CALLS IT ARMED REVOLT.

The Centralia Tragedy Described in House as Declaration of War.

WASHINGTON, Nov. 13.—The shooting of four ex-service men in Centralia, Wash., was described in the house yesterday by Representative Johnson, Republican, Washington, chairman of the immigration committee, as "an attempt at revolution with bullets and rifles, which the country has long feared." Mr. Johnson sent a telegram to Mayor Rogers of Centralia saying the country "must be purged of seditionists and revolutionists to the last one, and if this means war, the quicker it is declared the better."

"We of the Pacific Northwest have long seen it coming," he said. "We have been patient, have avoided bloodshed under every provocation, only to see these young men murdered. Their death will arouse the loyal people of the United States as nothing else has done."

"History will record these heroes as among the first to fall in an attempt at armed revolution against the United States and for which every man who has been preaching syndicalism, communism and class hatred is responsible."

Government leniency towards radicals was responsible for the Centralia outrage, Senator Poindexter of Washington said.

MY DEAR, THE CORSET IS A NECESSITY AND SHOULD NOT BE TAXED

CHICAGO, Ill., Nov. 17.—Unconstitutional discrimination against the rights of women possessing an excess of adipose tissue through the operations of the luxury tax on corsets costing \$15 or more, is charged in a petition to Representative Jas. R. Mann, asking repeal of the law.

Byron W. Wight, an attorney, who prepared the petition, contends the taxed corsets are a "necessity" and not a "luxury."

"Furthermore," the petition continues, "said tax is a discrimination between small and slender persons and large and portly persons, and is in violation of the constitutional rights of women."

The petition has a number of prominent signers.

IF there is one thing that will drive a man to lemon extract, Socrates Sowers says it is the woman who has so much to do that she does nothing at all.

Cramps!

Says Mrs. Frank Hagler, of Carbondale, Ill.: "I was suffering terrible cramps and pains each month. I had used... but it didn't give me permanent relief. The pains came back on me just the same as before. After taking Cardui I was entirely relieved from the pains, and have never been bothered with them since."

TAKE

Cardui

The Woman's Tonic

Cardui should help you as it did Mrs. Hagler, as it has helped thousands of other women who suffered from the pains and discomforts from which women suffer. Many medical authorities prescribe the ingredients of which Cardui is composed for the female troubles for which it is recommended. Why not try it for your trouble?

Colonel Hawley Makes Third Talk To M. M. A.—Subject Is Militarism

Talk No. 3.

Some people and some papers, opposed to a central government, use "Militarism" as a "bugaboo" with which to deceive and frighten the unthinking people of our public into a legislative overthrow of our governmental policy of police protection.

To the intelligent thinker, however, the existence of militarism in the United States is rendered absolutely impossible by the cosmopolitan character of our people, by our great love for liberty and freedom and by the democratic institutions upon which our very nation is founded. The idea that there is any danger of the American people adopting and supporting a militaristic government is so obviously absurd as to be unworthy of consideration.

The purpose of the War Department in the formation of the Reserve Officers' Training Corps was to build up a system of defense which would be not only consistent with but which would support, morally and physically our democratic principles of government.

With those who are unacquainted with the full meaning of it, a certain fear or dread is apt to be incident to the use of the word "military." It is the wish of the author to dispel this fear and to breed in the readers a full confidence in and appreciation of the individual, industrial and national benefits inherent in military training. With these ideas in view, quotations will be made occasionally from War Department orders.

In Special Regulation No. 44, R. O. T. C., War Plans Division, General Staff, 1919, are found the following extracts: "Par. 52.—All subjects should be so taught that the student shall become capable of clear, quick thinking, shall acquire a power of analysis and shall have the faculty of concise logical expression. Par. 54.—

combination of training on the drill ground and in the lecture room, laboratory and living quarters. The following characteristics of an officer and a gentleman, which are inculcated by a proper disciplinary training, should be insisted upon: Neatness in dress, the cultivation of the manners and habits of a gentleman; a dignified and military bearing; loyalty; truthfulness; punctuality; kindness; earnestness of purpose and devotion to duty; the cultivation in the student body of esprit-de-corps; obedience to orders; acceptance of responsibility and avoidance of excuses."

This War Plans Division order is in force in every R. O. T. C. unit in the United States. We delegate to you, readers, the decision as to whether this is a "militarism" to be feared or sound doctrine of training in the basic principles of good and useful citizenship.

The Missouri Military Academy wants to make your acquaintance.

H. HAWLEY.

War Disabled 800,000 Englishmen

LONDON, Nov. 14.—More than eight hundred thousand Englishmen are permanently disabled as a result of war, according to the official estimate just given out here. This figure represents the startling total of about 5 per cent of the total number of workers in the entire country.

FROM a feminine viewpoint there is no span between the vale of years and the vale of tears.

Wires Were Costly.

WASHINGTON, D. C., Nov. 14.—The war time operation of the wire systems of the United States by the government cost the Federal authorities over fourteen million dollars according to Postmaster General Burleson.

JUDGING from the way some of the Senators are acting in Washington, says Col. Socrates Sowers, there is even a shortage in food for thought.

"Gets-It" Peels Your Corns Right Off

Two Drops Will Do It Without Pain or Trouble. Never Fails.

There's only one way to get rid of a corn, and that is to peel it off as you would a banana skin. There is only one corn remover in all the world that does it that way, and that

There's No Corn "Gets-It" Will Not Get." "Gets-It" is because of this fact that "Gets-It" is today the biggest seller among corn-removers on this planet. It means the end of "corn-budding." For hard corns, soft corns, very old corns, young corns, corns between the toes and calluses, it means a quick, certain finish. "Gets-It" is applied in 2 or 3 seconds. All you need is 2 or 3 drops. As easy to do as signing your name. It does away forever with tape, plasters, bandages, knives, corn-diggers, scissors, files, your corn-pains, be corn-free at last. "Gets-It," the only sure, guaranteed, money-back corn-remover, costs but a trifle at any drug store. Mfd by E. Lawrence & Co., Chicago, Ill. "Sold in Mexico and recommended by a stbe world's best corn remedy by LLEWELLYN & SONS."

"RESULTS MORE THAN CLAIMED"

So testifies Mr. J. F. ARENDT, Box 44, Remlig, Texas

PE-RU-NA

THE REMEDY FOR EVERYDAY ILLS

For Catarrh and Catarrhal Conditions

The evidence of one man like Mr. Arendt is more convincing proof to you of the merits of Peru-na than any written words of ours. For fifty years Peru-na has been the standby of the American family for diseases due to catarrhal inflammation of the mucous membranes lining the organs of the body. Thousands, like Mr. Arendt, have proved the effectiveness of Peru-na for coughs, colds, nasal catarrh, stomach, bowel and liver disorders or any disease characterized by a catarrhal condition. If your suffering is the result of a catarrhal disorder try Peru-na. It is a true, tried medicine.

Sold Everywhere

Tablets or Liquid

Ninety-seven per cent. of the people have catarrh in some form.

OVERLAND 4 MAKES HIT WITH PUBLIC

Unusual Interest Has Been Centered in This Latest Model of Motor Car

NEW TYPE OF SPRINGS

Three-Point Suspension Design is Introduced for the First Time With Much Success.

The new Overland 4 which is being shown at Smith Bros garage, is attracting much interest.

This improvement is the use of three point suspension springs. It is a combination of two principles that have been used to greatest advantage in automobile construction: First, that of cantilever springs; second, the flexible three-point construction.

The luxurious riding comfort these springs furnish the car was immediately understood and appreciated. It is this feature which gives to the new

Overland 4 its unique character. Each spring flexibly responds to its task of keeping the body and passengers riding on a constantly even keel. The result is a roomy, easy-riding car on a new type of springs so designed as to absorb road shocks from the worst of pavements or roads. The Willys-Overland engineers make the unusual claim of having produced a car that rides well on any road.

Second—Economy. The new springs so protect the car from road shock as to make possible much lighter weight and hence a great saving in fuel and tires. Furthermore, the car is so simple and accessible that costs of upkeep and repairs must be greatly reduced. Yet the car's parts have a protected accessibility—a big factor in upkeep. The car is assembled from five units only. The chassis is clear of all involved mechanism. The entire assembly requires only 50 bolts. The engine is a remarkably high-grade, thoroughly up-to-the-minute power plant, compact and simple. The neatness and cleanliness of design bespeak the ready accessibility to all parts.

Third—Quality. Specifications in-

feature in automobile construction. The body is all-steel with an oven-baked enamel finish. The construction is simple and the balance of part to part is unusually fine. The car has been designed light weight.

Fourth—Bountiful and complete equipment. In every detail from demountable rims to Auto-Lite starter, lights and horn, the equipment of Overland 4 appears to have been planned with a single view of comfort, convenience, and long service.

The clutch is of the single plate type now used by 71 per cent of the motor manufacturers. The selective gear transmission has three speeds forward and reverse. It operates in oil.

The car is equipped with two brakes—foot and hand. These work on 10-inch drums on each wheel and to assure safety are larger than necessary demands.

The car has a streamline body which is entirely constructed of steel with slanting windshield. The full-crowned fenders are of heavy sheet steel. The running boards are covered with linoleum, aluminum bound. The body and chassis are finished in hard baked enamel. The fittings are nickel and polished aluminum.

The car is equipped with an Auto-Lite two-unit starting and lightning system, headlights with a dimmer, dash and tail-lights, a magnetic speedometer, electric horn, spare tire carrier, extra rim, complete set of tools, tire repair kit, jack and pump. The tires are mounted on demountable rims.

IS YOUR CHILD UNDERFED?

Malnutrition Is Said by Authorities to Be Cause of Many Ailments.

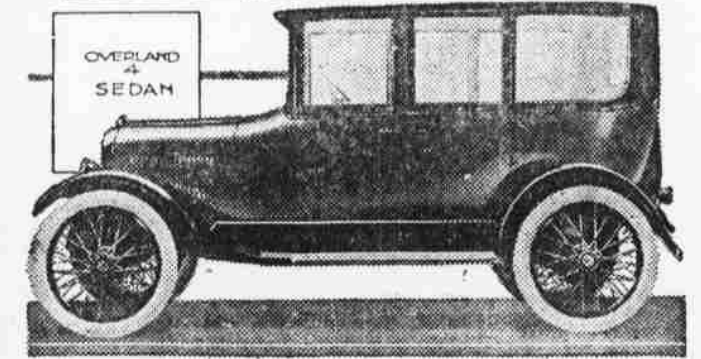

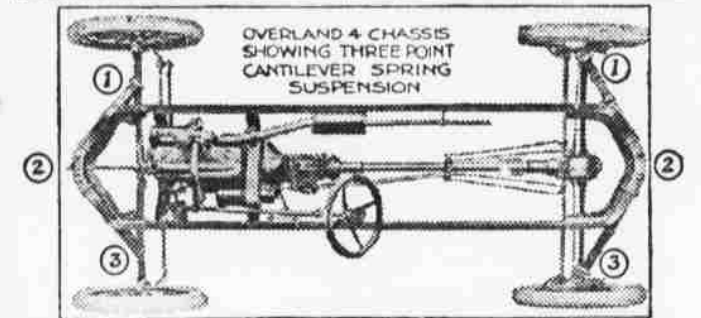

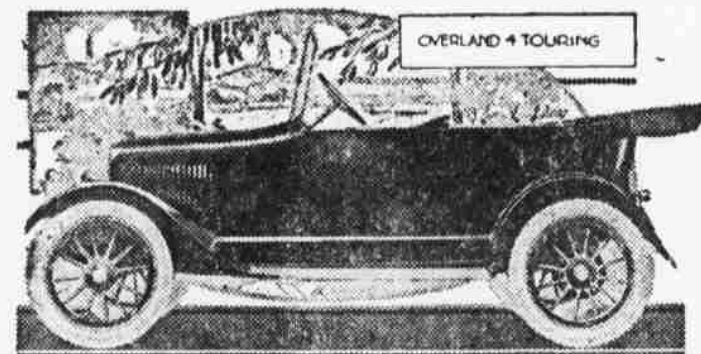

The following facts concerning malnutrition and its significance in the life of children have been given out by the community nurse:

Malnutrition is something which, in the great majority of cases, is preventable and curable. Its detection requires no expert medical knowledge or careful microscopic examination. The weight of the child and its rate of gain usually tells the story. The malnourished child is usually pale, anemic, inattentive, listless in its studies, easily fatigued, both mentally and physically, usually retarded in its school work, and peculiarly susceptible to diseases.

Every child has a right to be as healthy as present knowledge can make him. Proper feeding is one of the chief factors along with the few other simple laws that govern health. The relation of weight to height is significant as a starting point to determine a child's condition as regards nutrition. His rate of gain in weight and height is even more important as showing his progress. In neither of these is the increase uniform or continuous for long periods of time. There are some periods in every normal child's life when there is very little development. But children who are below normal weight usually gain rapidly when the cause of the trouble is located.

In a single weighing contest there is one definite thought, namely, that

dicte that the Overland 4 has been built in each part of the finest quality steels and steel-alloys. The car's parts have been machined within the closest possible limits, permitting a quality of construction equal to that of a hand-made product. Inspection starts at the steel mills where the company has stationed expert metallurgists to test every heat of steel, and the inspection ends only with the owner's driving the car away. The stock reaching the factory is thus all first grade through many inspections. This itself is a new

Overland car, designed for light weight, that degree of riding comfort and security hitherto possibly only in high-priced, heavier cars.

The distinctive features, of this car, each worth the motorist's study, are:

First, of course, the three-point cantilever spring suspension. The springs on Overland 4 extend fifteen inches from a point on the chassis beyond the axles at front and rear, giving a wide diagonal shape to the springs. The car has thus an actual springbase of 130 inches, although the car wheelbase it-

They Win You On Quality!

Your enjoyment of Camels will be very great because their refreshing flavor and fragrance and mellowness is so enticingly different. You never tasted such a cigarette! Bite is eliminated and there is a cheerful absence of any unpleasant cigarette after-taste or any unpleasant cigarette odor!

Camels are made of an expert blend of choice Turkish and choice Domestic tobaccos and are smooth and mild, but have that desirable full-body and certainly hand out satisfaction in generous measure. You will prefer this Camel blend to either kind of tobacco smoked straight!

Give Camels the stiffest tryout, then compare them with any cigarette in the world at any price for quality, flavor, satisfaction. No matter how liberally you smoke Camels they will not tire your taste!

R. J. REYNOLDS TOBACCO CO. Winston-Salem, N. C.
